We are pleased to share another wonderful rehab success story from:

Advanced Specialty Hospitals of Toledo
1015 Garden Lake Parkway, Toledo Ohio 43614
(419) 381-0037

Donna was admitted to Advanced Specialty Hospitals of Toledo following her admission to St. Vincent's Hospital for high output ostomy that led to significant dehydration. Her stay was complicated by AKI and a UTI which was treated with IV fluids and antibiotics. She also experienced auditory hallucinations during her stay. She was started on TPN and further stabilized for transfer to ASHOT.

Donna arrived to ASHOT in January of 2024 with decreased mobility, confusion, and increased need for assistance from caregivers. Nursing staff worked closely to educate her on caring for her ostomy. She worked with our therapy team to regain strength to ambulate with a walker and increase independence with functional ADLs.

We wished Donna the best as she discharged to a SNF for further rehab to ensure a safe return home. Thank you for allowing us to be a part of your recovery!

Functional Outcome Measures
