We are pleased to share another wonderful rehab success story from:

Advanced Specialty Hospitals of Toledo
1015 Garden Lake Parkway, Toledo Ohio 43614
(419) 381-0037

Drew was admitted to UTMC in June 2023 for shortness of breath and wounds. He required intubation due to hypoxic respiratory failure and was extubated during his hospital stay. He was found to have lymphedema and other wound concerns. He then stabilized and transferred to Advanced Specialty Hospitals of Toledo.

Drew was admitted to ASHOT for wound care management and providing rehabilitative and restorative care. He worked with physical and occupational therapy to complete his daily living tasks, transfer, and ambulate with increased independence.

Drew was discharged to inpatient rehab to continue his healing and strengthening for reaching his goal of discharging back home. We wish him the best of luck and are honored to be a part of his recovery.

Functional Outcome Measures
